Remote Firmware Upgrades via iSolarCloud

Disclaimer

The material in this document has been prepared by Sungrow Australia Group Pty. Ltd. ABN 76 168 258 679 and is intended as a guideline to assist solar installers for troubleshooting. It is not a statement or advice on any of the Electrical or Solar Industry standards or guidelines. Please observe all OH&S regulations when working on Sungrow equipment.

Applicability: Sungrow Crystal G2 Series, Three Phase Residential and CX range, Single-Phase Hybrid (SH5K-20/30), Three-Phase Hybrid Range

Communication Device Requirements:

Inverter Type	Communication Device			
Single-Phase / Three-Phase Residential Range (Grid-Connect & Hybrid)	V25/V31 Wi-Fi Dongle / E-Net Dongle / Direct Ethernet (Hybrid)			
Three-Phase Commercial Range	EyeM4, Logger1000			

Table 1: Communication Device Requirements

The new iSolarCloud now allows installers' accounts to do remote firmware upgrades at a click of a button. This feature allows installers to take advantage of the new updates and have the inverter's software up to date at all times. Hence, this document will cover the steps required to successfully upgrade the inverter/communication modules using the online web portal.

There are usually two reasons why a firmware upgrade may be required i.e.

- 1. To be able to access all settings for the inverter remotely
- 2. To keep the inverter up to date with the latest software

Some of the older inverter may require a firmware update for consumption monitoring purposes however, all the newer premium inverters should have the relevant compatible firmware for it.

SUNGROW

Upgrade Procedure

The **Firmware Upgrade** option can be found in the main menu under "**Advanced**". Selecting it will allow the user to search for the plant which needs to be upgraded.

Figure 1 Firmware Update & Plant Search

On selecting the plant, the relevant device and type can be selected on the right. Please use the following guide with respect to Figure 2 to locate the device:

- Grid-Connected Inverters Inverter
- Hybrid Inverters Energy Storage System
- Loggers Data Loggers
- Wi-Fi Dongles Communication Module

Figure 2 Device Type

Once the type has been selected, the relevant device must be selected and then click "**Firmware Update**". The clock symbol can be used to check the task history and status of the upgrade.

Figure 3 Firmware Update

This will give a prompt to select the updating package. Here "**Online Update Package**" can be selecting. This option will show if there is a newer update available and will update the device to it. Thereafter, simply click "**Update**".
